

REFURBISHMENT OF ST MARTINS SURGERY, RUISLIP

Work will commence in June on the remodelling of the surgery to provide an up to date and enlarged GP facility.

The Surgery will remain open during the construction work.

The plans show the existing building overlaid with the planned phases of work. Each phase will be completed before the next phase starts so that completed phases can be used by the surgery.

The First Phase will be the conversion of the first floor and the construction of the new access to the first floor. While the new stairs and Platform lift are being constructed a temporary entrance will be formed through the side of the surgery. The works will include an accessible Reception Desk and new back office on the ground floor. The temporary entrance, together with temporary toilets will remain in place until the new Reception Desk and WCs are complete.

The completed project will conform to all current legislation making it more environmentally friendly and accessible to all.

The project is programmed to be completed before the end of March 2019 and we will update this display as the work progresses.

Please be patient during the disruption.

For further information please contact the Mrs Chimmyraj Raj, Business Manager.
